Excerpts from ODP Div/Staff Reports for Week Ending 19 August 1983Management Staff

Finance. As of 16 August, there were 27 outstanding advances with a dollar value of \$16,200. No accounts were delinquent. [redacted]

25X1

Funding for CAMS. The Comptroller has approved our request for prior year funding for CAMS to accommodate the remaining shortfall in 1983. [redacted]

25X1

Data Spillage. There was a spillage incident reported by a VM user. The user's minidisk was contaminated with data belonging to other users. A review by SPD disclosed that the problem was caused by new Comten software installed a few days earlier. The problem was resolved by SPD. [redacted]

25X1

Community Information Retrieval System (CIRS). On 11 August, [redacted] attended a meeting of the CIRS Security Working Group (CSWG). Speakers from State, NSA, DIA, FTD, NPIC, and CIA (DDO, OCR, DDI) described their organizations' policies and procedures for the internal and external dissemination of classified information. The CSWG is charged with developing CIRS information sharing policies and security procedures. [redacted]

Special Projects Staff

The Northside Computer Center Phase II construction is 40% complete and on schedule. All chilled water pipes have been installed. Minor details on connecting fire alarms, smoke detectors, and halon systems to the existing operational systems need to be completed by the contractor. Air conditioners are due for delivery on 25 August. [REDACTED]

25X1

Modems and dataphone equipment were delivered by American Bell to the SAFE contractors to provide access to the Development Processor. The statistical multiplexors will be delivered in the first week of September. Installation and completion of all equipment to support contractors on the SAFE unclassified system should be completed by 15 September. [REDACTED]

ODP 83-1203  
18 August 1983

MEMORANDUM FOR: Deputy Director for Administration

FROM:

[REDACTED]  
Acting Director of Data Processing

STAT

SUBJECT: ODP Report for Week Ending 19 August 1983

1. Revised SAFE Plan

The Comptroller's Office has agreed to accept the Revised SAFE Project Plan, dated 29 July, as our response to the DCI CIA Guidance calling for a revised plan based on the redirection of SAFE.

2. External Procurement

The Office of Data Processing (ODP) concurred on the procurement of five personal computers by the Office of Finance (OF): four Wang "Professional Computers" and one Grid portable microcomputer. These systems will be used by various OF components to automate processes that are currently performed manually.

3. Chilled Water Outage

The scheduled chilled water outage at the Northside Computer Center on 13 August lasted for three hours. SAFE systems were down from 1430-2030 hours. No message traffic was lost on either system.

4. New CAMS2 Processor

The new CAMS2 processor (3081K) was delivered and installed by IBM on 15 August in the 1D16 Annex of the [REDACTED] Computer Center. ODP's Engineering Division began extensive hardware testing on 16 August and reports no problems to date. ODP's Processing will turn the system over to the CAMS Project on or about 1 September.

STAT

5. Terminal Upgrades

ODP's Teleprocessing Branch completed the upgrades of all Delta Data 7260 devices to a 4 MHz clock and Version 3 software. The modified terminals are now capable of running at a 9600 baud line speed. This was the first milestone in our plan to migrate users to a faster terminal speed.
